The Color Replacement Brush is ideal for color correction. The Brush Tool is your best friend for painting on any object in your image. The Content Aware Fill tool is great for filling in masked areas on a photo. It can be used for any type of content in your image, such as people, animals, landscapes, buildings, etc. The Dodge and Burn tools are used for creating effects, such as adding shadows, highlights, or reflections. Eraser is used for painting out unwanted elements from an image. It is usually used to remove scratches, marks, or unwanted items. The Healing Brush helps you recover damaged areas in photos. With its combination of different painting techniques, it can be used for a variety of purposes. The Masking Tool is ideal for creating presets, adding content to an image, or working on layers. It can be used in any image. The Pen tool is a very useful tool. It allows you to paint directly onto layers and work with various pen settings to create custom brushes. The Perspective tool is great for creating virtual 3-D objects in your image. You can erase the background and create a new layer by using the warp tool. The Save Layer As... command can be used to save the currently selected layer as a new file. The Shadow and Soft Light Tools are used to add shadows, highlights, and reflections to photos. The Spot Healing Brush tool is ideal for filling in small areas. Its brush settings are great for dealing with all types of fine scratches. The Transform tool is used to rotate, scale, or flip your images, and to make various design changes to them. The Zoom tool is used for reducing the overall size of an image or increasing its resolution. The Crop Tool is used for cropping your image. It will allow you to remove distracting elements from your original image. The Channels Panel displays the individual channels in an image. The Adjustments panel has a number of tools that can be used to make changes to your image. These tools are useful for correcting brightness, contrast, color, and exposure, and for adding and removing artistic elements from an image. Some applications require users to change the default values of the "System Preferences." This method is not quite a way to change the default values in Windows OS. The user will be expected to make changes once their changes are saved and activated. The "System Preferences" file is a collection of settings. It is located in the following folder location:

Q: Forbidding access to private static final variable I have a class where I try to prevent access to certain static (static final) variables. It works fine, unless I declare the private final static instance variable as final. Then, the compiler complains that the initialization is redundant. Here is a simplified example: public class MyClass { private final static MyClass instance = new MyClass(); private static class MyClass { private MyClass() { } } } What I want is that the class should be able to store an instance of MyClass in memory only once. How can I prevent an instance of MyClass from being created more than once? A: static final variables are constant, and as such need to be initialized at the start of the class: private static final MyClass instance = new MyClass(); A: If you want to enforce that only one instance of MyClass is ever created, you need to make MyClass a final class. There is no way around this restriction. Q: How do I find the missing job? Is there any way I can find the missing job from the hudson.plugins.git.GitSCM.history file I have pasted here? Now looking at it, it seems to be for some of the builds I use in Jenkins, but it's not obvious what the values for origin and ref are. There seems to be some way of getting the refs when using the Force Push plugin, but I'm not sure whether that applies to this case. A: Does git config --get-regexp 'refs/heads/branch-name' give what you expect? If it doesn't, you could manually parse the GitSCM.history file using some tool that does it (eg, sed). Bicycle Ride to End Homophobia On October 26th, more than 300 cyclists will embark on a 240 mile journey through Ohio, Indiana, and Kentucky in support of Let It Be Gay! Ohio. The journey is the first step in a campaign which will culminate in May 2007 when gay couples across Ohio will legally marry. State Rep. Jerry Austin, who will be cycling with the group, says the idea came to
