It's so easy to get lost in this game.

No, I don't mean it's confusing. No I don't mean you'll be unsure of what to do next.

No no, I mean you will lose all sense of time. Your mind will ease, and the music will set the mood. You will be immersed. You'll make something new and see if it works. You'll generate a new galaxy and do it all again.

Gameplay is an 8/10, Music is a 9/10
The game is really good.

Oh yeah, and if you have ever heard the music on YouTube... Just know that the encoding that YouTube does really messes up the bass. This game has a very strong bass, and YouTube doesn't do it justice.. Is this a joke release, even for early access I'm wondering is this a joke.

Pros+
Music
Performance on low settings still looks half way decent at 35-50fps

Cons-
Everything else
Character Creation/Customization is limited, very limited
Can't change user name for character you make
Gamepad support doesn't work
No graphic settings to change, can't change resolution
You can however change it from "low to high", might as keep it on low because setting it on high you will get 10fps
There's nothing to do
There's only one area unlock / available to play
You need some sort of in game money to bowl, but it doesn't explain how to get it
All you can do is bowl
Every other thing / area is unlock or says coming soon
Thus, there's only one area to roam in, a small bowling alley
You can't jump
You can't change the keybinds
You can't do nothing but make a boring looking character and run around in circles in the one area which is unlock
You can sit down and the animations to that is downright laughable.

Bottom line:

This is like 5% finish and its not even funny. Why is this game on steam? Its not even completed, my goodness. Not going to even bothered with this game until they are finish, and judging by that, it seems like it will be fully completed in Summer of 2017. Avoid this crap.. I really like this game. As of all clickers it's addictive!

What I don't understand is why a lot of people are easily butthurt about it.

It's just a game. A lot of people are like: Oh my god! This offends me because of that thing or that thing, but when you click the "About" button it says that this game does not mean to offend any politics or politicians.

So please stop being so easily butthurt..

This game is awesome!

. The only reason I purchased this game in the first place was because I got a coupon for 75% on this title from leveling up my profile, and so I thought this game looks cool so why not? But once I bought this game it made me feel like a lil kid that played Wii Play Tanks & Battle City inspired flash games with its solid movement, combat, and gameplay. a very solid and enjoyable puzzle fps. red faction-style terrain destruction tied to some clever puzzles, plus a rad force-field gun. it's good and you should buy it!. This game is a beautifully crafted masterpiece, yet creates an eerie atmosphere that could through off anyone.

It's very narrative driven but the puzzles is the main area in which you will spend your time. The progression system hits the sweet spot, and the final puzzel was extremely good. The fragments of story scattered through are a nice touch in the puzzles. Altogether a top quality game, would recommend. horrible bridge building controls and horrible stunt gameplay. even for a budget series, this plays terribly. not worth your time.. I liked that this game kept it simple, short and sweet.

Good puzzles, a bit easy for the most part -but it also made for good pacing without dragging on and overdoing new gimmicks like many other puzzle platformers.

Absolutely good game. Somehow, of some odd reason, I find this game great and would definitely recommend it to others. So this game is short and simple, the second video on steam explain everything about how this game is being played, i grabbed the gaem for \$1.4, which was a steal so i can play this game with my friends and family later on.

It's a simple game but really fun and easy to play, once u start playing this game u can't stop playing it

. Still has some links to work out. Control scheme resets each round, which always forces me to take a few seconds before I can play to verify how they're set up. My friend and I experienced some weird teleporting while playing.

Overall the game is really fun and I can tell it's going to turn out great! But you can definitely tell it's still a work in progress.. Not worth the money, too short and the jokes are not funny. Skip this one, not worth it even at half price.. Well worth \$5. This game was the best thing Kongregate had seen in years and I'm really hapy that not only did the dev get a version on steam quickly, but that it's so much more polished. I really hope more content keeps coming because it's a lot of fun.
